

SIKA AT WORK

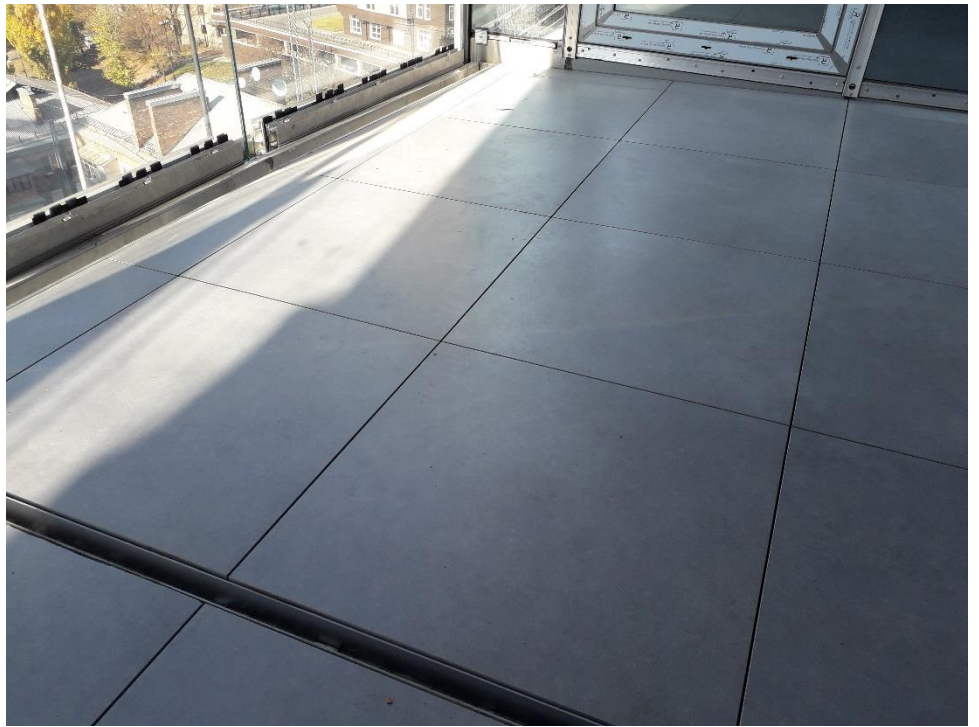

RESIDENTAL COMPLEX «TARYAN TOWERS» (KYIV, UKRAINE)

Sika Technologies: Thermal insulation & Waterproofing & Tiling systems for balconies and terraces

BUILDING TRUST

NAME:

PROJECT DESCRIPTION:

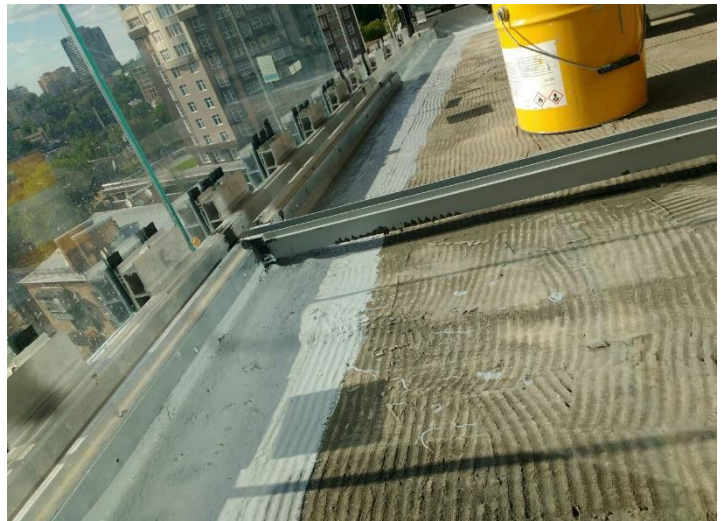

«Taryan Towers» Residential Complex is the epitome of the future. The three towers of the new building were designed by British architect John Dawse, inspired by the modern architecture of advanced Dubai, the multifaceted Singapore and traditional London. Buildings of the construction project will be interconnected by glass bridges. Project also include 3-level underground parking for 670 vehicles, exclusive exposed roofs (restaurant, winter Garden, lake and relax zone), etc.

REQUIREMENTS FOR PROJECT:

Reliable solution for waterproofing balconies and terraces.

OPTIONAL SOLUTIONS FROM SIKA:

Systems of materials for facade structural glazing.

PRODUCTS USED

Sikalastic®-152, Sikatherm PIR GT, Sikalastic® Concrete Primer, Sikalastic® Metal Primer, Sika Flexitape Heavy, Sika® Reemat Premium, Sikalastic®-614, SikaCeram®-213, Sikaflex® PRO-3, Sika® Primer-3 N.
