

SIKA AT WORK

EDELWEISS HOUSE
(KYIV, UKRAINE)

Sika Technologies: Sikaplan roofing and waterproofing

BUILDING TRUST

EDELWEISS HOUSE

PROJECT DESCRIPTION:

EDELWEISS HOUSE is a residential complex in the Pechersk district of Kyiv. The new project consists of two twenty-four floors buildings built of environmentally friendly materials on a common stylobate. Its roof is designed with playgrounds and sports grounds, as well as a recreation area. The stylobate itself has a 6-level car park, car wash and charging stations for electric cars.

REQUIREMENTS FOR PROJECT:

The owner required an effective and durable waterproofing solution for the podium deck and roofs of the high rises.

SOLUTIONS FROM SIKA:

The **Sikaplan® WP 1100-20HL** PVC membrane was chosen for its proven durability and cost effectiveness. It provides reliable waterproofing of the 5 500m² ballasted roof of the podium deck.

Sikaplan® 18G is used for the roofs of high-rise buildings.

Flashing details were done with laminated sheet and **Sikaflex® PRO-3** PU sealant.

PROJECT PARTICIPANTS

Developer: Edelburg Development

General contractor: Budivelnyi Aliance

Waterproofing contractor: Pylon

Sika Ukraina: Artem Zakharov
