

SIKA AT WORK

Renovation underground pass (Kyiv, UKRAINE)

Sika Technologies: Sikagard® protection coating

BUILDING TRUST

UNDERGROUND PASS:

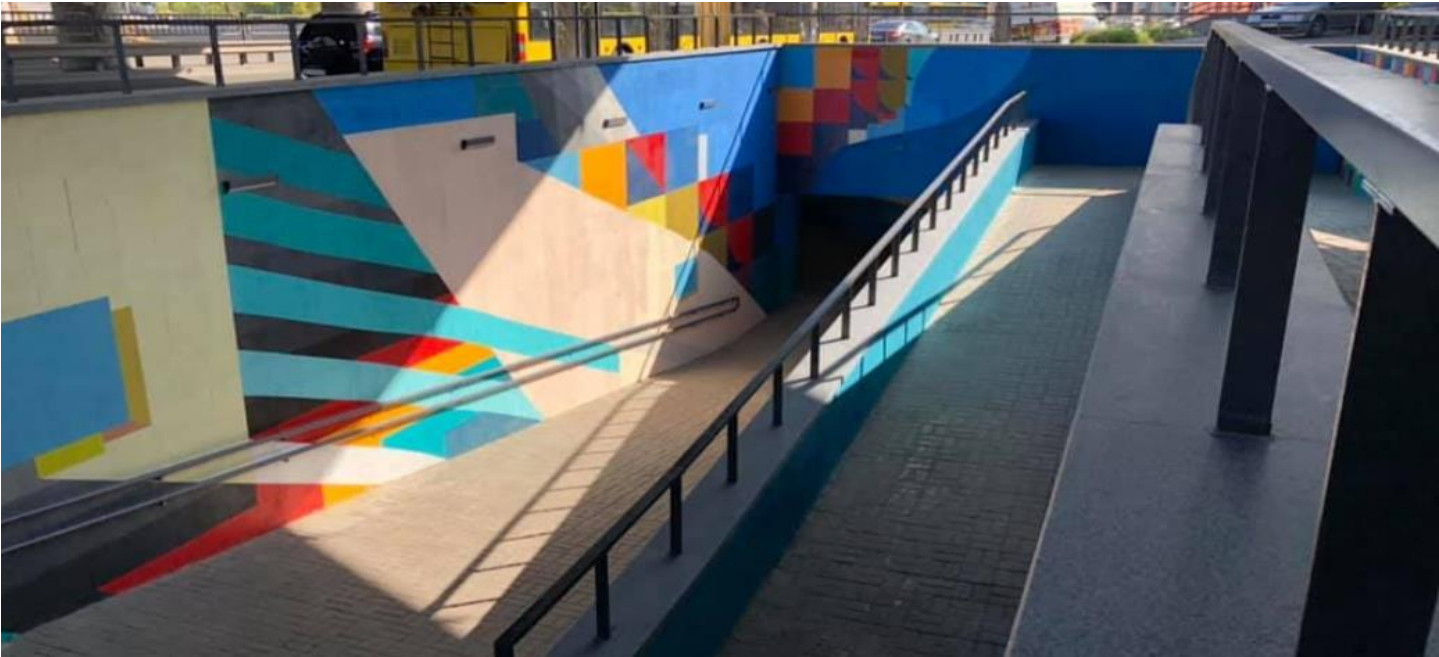

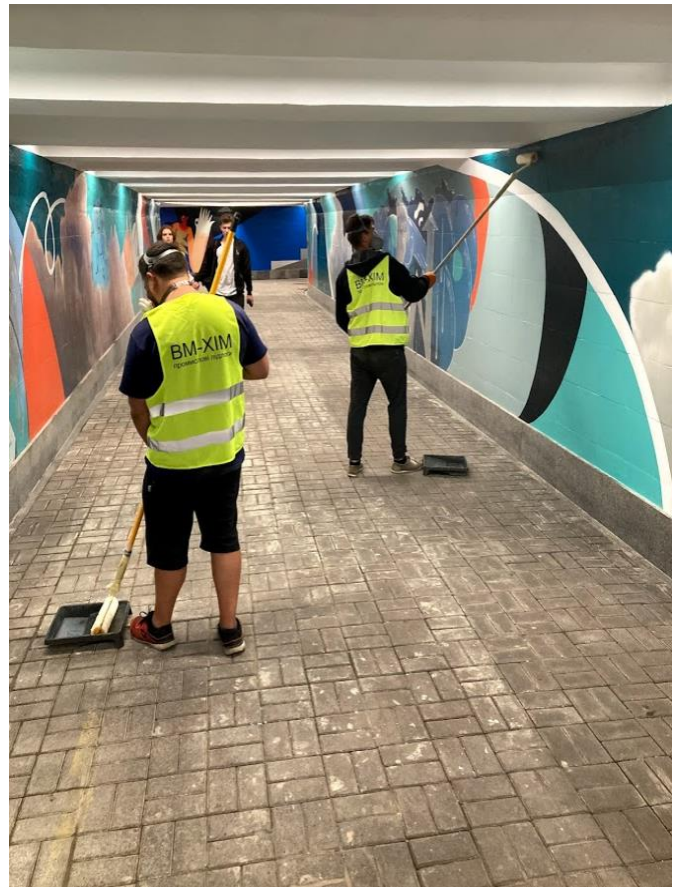

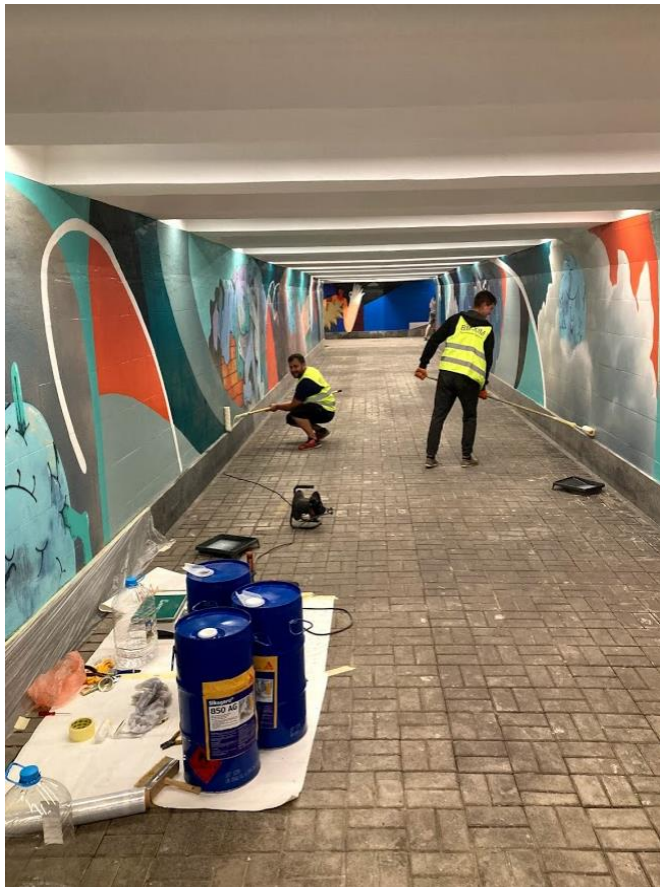

PROJECT DESCRIPTION:

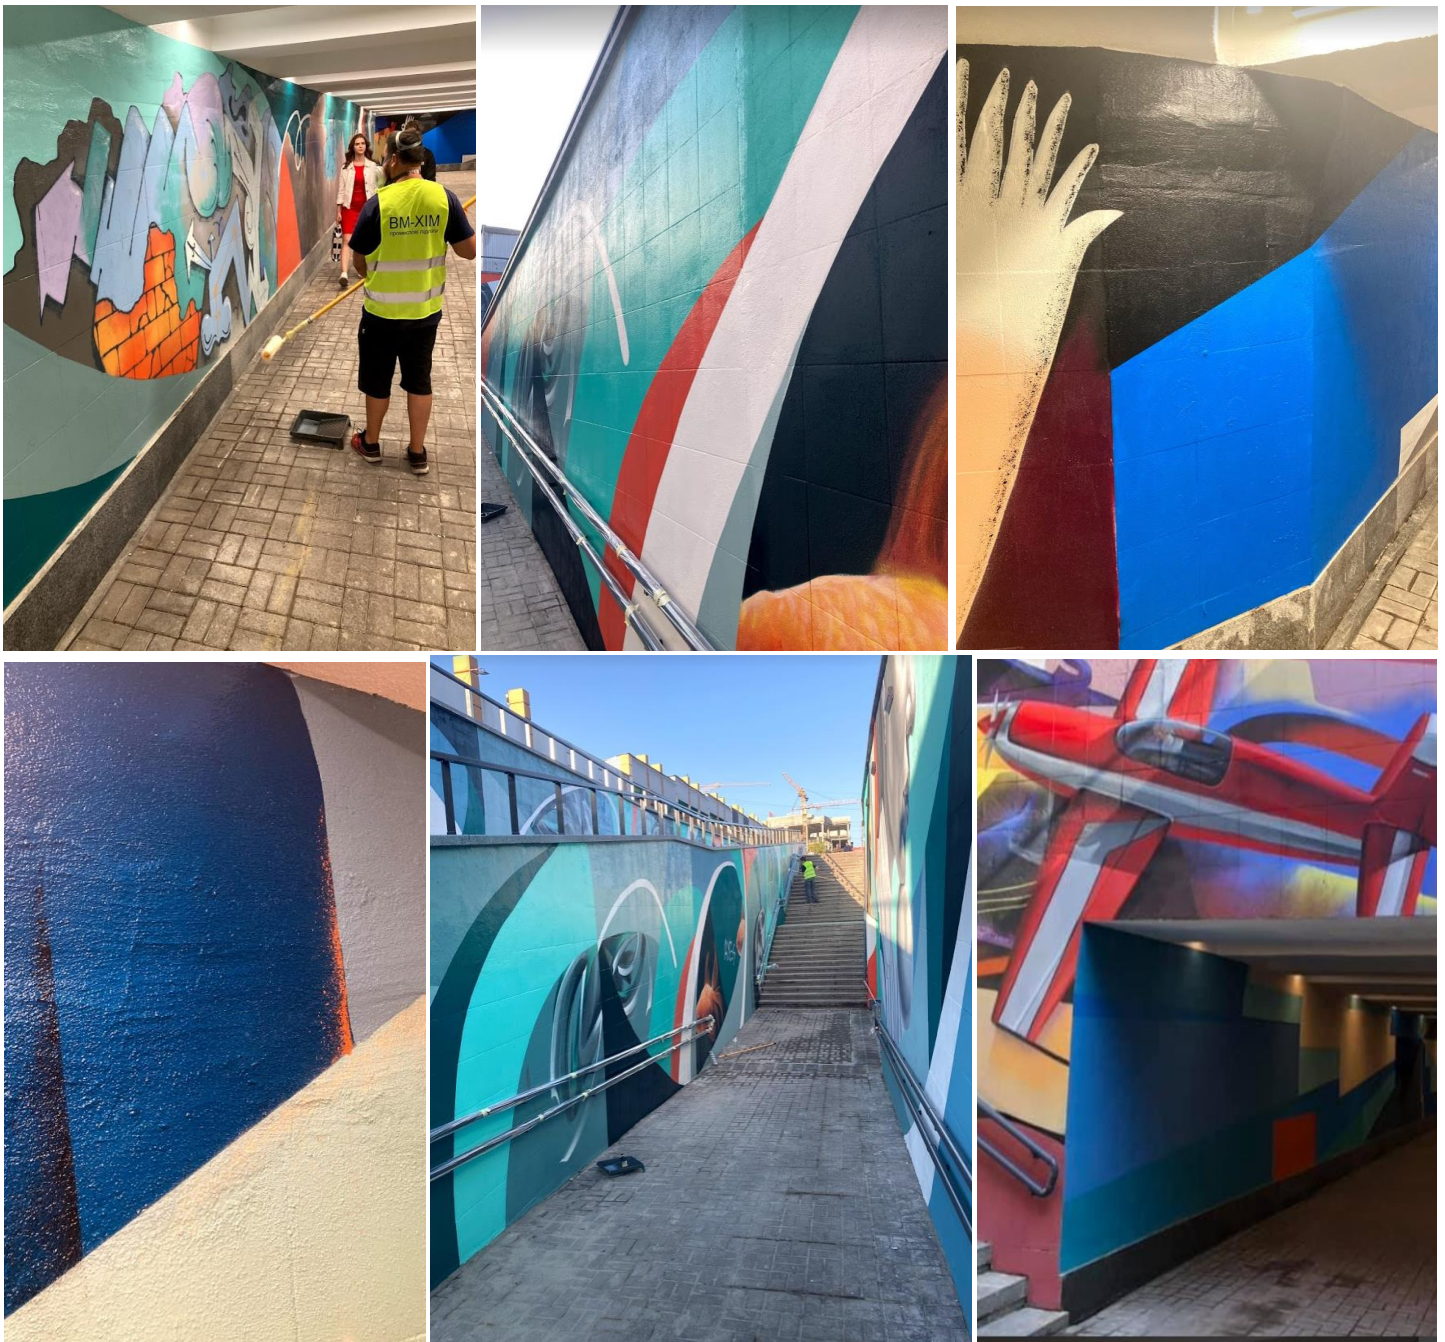

The customer carried out the renovation of the underground pass on Demeevskaya square, near the Kiev factory ROSHEN, having completed the finishing of the walls with murals.

REQUIREMENTS FOR PROJECT:

It is necessary to protect the surface of the murals from graffiti and posters both inside and outside the underpass, without changing the color of the surface.

PRODUCTS USED

Sikagard®-850 AG.
