

SIKA AT WORK

Imperial Tobacco Ukraine High-Rise Warehouse (KYIV, UKRAINE)

Sika Technologies: Sikaplan roofing

Sikafloor dryshakes

BUILDING TRUST

HIGH-RISE WAREHOUSE FOR IMPERIAL TOBACCO UKRAINE

PROJECT DESCRIPTION:

Kyiv Tobacco Factory was founded in 1861. In 1998 manufacturing capacities were transferred from Kyiv's centre to a more suitable industrial site. Production modernization project of 2014 included construction of a new 35m high-rise warehouse and automated logistics facilities.

REQUIREMENTS FOR PROJECT:

The owner required an effective and durable roofing solution for the new facilities. Special attention was paid to extreme wind loads as the production site sits on a hill close to the Dnipro river.

Automated logistics department required a durable flooring solution and quality joint sealing.

SOLUTIONS FROM SIKA:

The **Sikaplan® 15VGWT** PVC membrane was chosen for its proven durability and high quality standards. Fire protected ballast roof areas were done with **Sikaplan® SGMA 1,5** PVC membrane. Many ancillary prefabricated elements were used: corners, overflows, safety posts flashings etc.

For better abrasion resistance **Sikafloor® 1 ArmorTop** was applied in all new facilities. Floor joints were sealed with **Sikaflex® PRO-3** PU sealant.

PROJECT PARTICIPANTS

Designer: DELTA Projektconsult

General contractor: Scorpion RP

Roofing contractor: Astra NV

Sika Ukraine: Artem Zakharov
