

# SIKA AT WORK

AUSHAN, Ramp (KYIV, UKRAINE)

Sika Technologies: System of waterproofing membranes: Sikabit®

System of amplification: Roll waterproofing membranes for transport facilities – Sikabit® P 50-15 HR 30

BUILDING TRUST

NAME: AUSHAN, RAMP

**PROJECT DESCRIPTION:** On the facility has successfully completed the waterproofing of the loading ramp of one of the Auchan stores. Was used bitumen primer Sika Igoflex P-10 and the polymer bitumen membrane Sikabit P50-15 HR30. The system used provides for further laying on the membrane of hot asphalt. The project was implemented together with the partners company – Penetron MK. Waterproofing area is 1800m<sup>2</sup>.

**OPTIONAL SOLUTIONS FROM SIKA:**

Waterproofing solution of the concrete base was used, followed by laying of the asphalt coating.
